

capsicum, olive and basil.”

Next year, Virgin Australia’s entire Boeing 777 fleet will be refitted with revolutionary new Business Class seats, which represent a major enhancement to the travel experience on board. The seats, which convert into 80 inch fully-flat beds, are the first major product innovation under the airline’s Virgin Vision 2017 strategy.

An innovative 1-2-1 configuration will guarantee passengers a window or aisle seat and maximum privacy to work, rest and unwind. The suite includes a unique tablet holder, a 16 to 18 inch touch screen for entertainment, multiple lighting settings and plenty of storage. The seat also offers the ultimate comfort with new soft furnishings, a number of adjustable positions to suit the differing needs of customers and an adjustable arm rest to increase the seat width when sleeping.
